MARINE MATTERS

Lindblad Expeditions founder and president, *Sven-Olof Lindblad*, goes behind the lens to show you the amazing wildlife that you'll discover aboard the line's expedition cruises.

Clockwise from Left: **ADORABLE** » An Adélie penguin looks curiously into Lindblad's camera during a visit to Antarctica aboard *National Geographic Explorer*. **MOMENTOUS** » Guests enjoying an up-close encounter with a crabeater seal in Antarctica **UPCLOSE** » A gray whale comes right up to young guests in Bahia Magdalena this spring. These gentle giants can reach almost 50 feet in length. **ALL SMILES** » A dolphin rises to greet human visitors from the *National Geographic Sea Bird* in the waters of Baja California. **PREHISTORIC** » Marine iguanas creep through the Galapagos' volcanic landscape, just as they did in the days of Darwin's visit.

GIVE BACK » *Parthole Cruise Magazine* announces that for every new subscription made in May and June 2014, a portion of the proceeds will be donated to the Lindblad Expeditions-National Geographic Joint Fund for Exploration and Conservation. The fund's efforts support global, regional, and local initiatives in ocean conservation, research, education, and community development.

» **FOR MORE INFORMATION** on Sven-Olof Lindblad and Lindblad Expeditions' alliance with *National Geographic*, see page 78.

» **TO LEARN MORE** about the LEX-NG fund and to find out how you can donate, visit expeditions.com/conservation.

“Our ships travel on the ocean,
and we explore the undersea.
Encountering an *unrivaled*
number of marine animals is
what sets our expeditions *apart*.”
