VIRTUAL EXPEDITION 2020

# Birds & Mammals

## SPECIES LIST

An explorer is curious and adventurous, observing and documenting the world around them. Use your eyes and ears, curious mind, maybe even a pair of binoculars—to keep track of the wildlife and plants you see while exploring nature, even outside your front door. Use this list to track your observations of animals in your neighborhood or on hikes. Need some guidance spotting and identifying species? Apps like *Seek by iNaturalist* and *Merlin Bird ID* are great resources.

| COMMON NAME/SCIENTIFIC NAME | DATE | LOCATION/OBSERVATIONS |
|---|---|---|
| American Robin-<br>Turdus migratorius | Apr 10<br>Apr 15 | Building a nest beside garage<br>Eating worms in the yard |
