THE LINDBLAD-NATIONAL

ULTIMATE POLAR EXPEDITION SHIPS

Exploring Antarctica should be a pinnacle event in a traveler's life. We're committed to doing whatever it takes to make your experience the most memorable ever—and our expedition ships are key. Top-tier Ice Class vessels, each is purpose-designed and built, incorporating 55+ years of polar experience, for exploring the ice in comfort and safety. The captains of the Lindblad-National Geographic fleet are extraordinary mariners, with decades of ice navigation expertise. Our expedition teams are hand-picked for their knowledge of polar natural history and their ice skills. Equipped with state-of-the-art tools, our ships are unparalleled bases for explorations. And the logistics on each are superb, designed to swiftly and efficiently get you off ship on your choice of thrilling daily forays.

A+ EXPEDITION TEAM

Many of the experts on our staff are veteran polar guides, with Lindblad for decades. Chosen for their knowledge in natural history, life and climate sciences, and the history

of polar exploration, they're also keen-eyed spotters able to optimize opportunities to observe each region's incredible wildlife.

TAKE GREAT PHOTOS WITH THE PROS

Travel with esteemed photographers and Lindblad-National Geographic certified instructors for inspiration & top caliber assistance in the field, so you can go home with your best shots ever. Participatory one-to-one critiques, 'laptop gallery' events and more engage beginners to advanced hobbyists.

Plus try out big-ticket gear from the exclusive B&H Photo Locker.

EXCLUSIVE UNDERSEA PROGRAM

Our ships don't merely use the Southern Ocean, recently deemed the Fifth Ocean by National Geographic cartographers, as a highway, we explore it. Only on our expeditions is an Undersea Specialist an integral part of the team. They dive the polar deep, or use Remotely Operated Vehicles (ROVs), to bring back images—often surprising and unexpectedly colorful—to enrich your understanding of Antarctica as a dynamic land-and-sea ecosystem.

GEOGRAPHIC DIFFERENCE

ACTIVELY EXPLORE EVERY DAY

Our Antarctic itineraries are crafted by explorers, and every itinerary point features opportunities to head out and discover, in one dynamic way or another—and all options are included in the voyage price; there are no extra costs at all. You can choose what you want to do and how active you want to be, whether kayaking among bergy bits, hiking up a ridge to a vista overlooking a cove, or instead taking a short stroll along the shore where penguins are gathered. Our seamless shore-landing operation, perfected over decades, gets you quickly ashore to share in exploring.

See photos like this and Antarctica's beauty can convince you it's all serenity & wonder. Our 50+ years of experience reminds us there's nothing tame about it. But it is the peak travel experience life on earth offers. So, join us, and rely on our expertise and respect for the forces of nature.

ICE FEVER: IT'S A THING

EDIFYING. EXHILARATING. AND DEEPLY MOVING.

The Antarctic ice sheet is the most distinctive feature of Earth as seen from space—every astronaut’s account mentions it. And the ice is what makes every Antarctic explorer vow to return. There’s a whole glossary of ice words to learn—macro-scale terms like fast ice, leads, and growlers, to more granular terms like brash and bergy bits. Ice is visually stunning, and nearly kaleidoscopic in its diversity of form. But what’s exhilarating to discover is the ice’s voice. Sitting in a stilled kayak, listening to the subtle sibilance of thousand-year-old gases releasing from a bobbing field of floating bergy bits is like eavesdropping on Earth’s whispered secrets. Once you’ve experienced it, you’ll never forget it.

“The single best whale encounter I’ve ever had. Over the course of two rounds of Zodiac cruises a group of very friendly humpbacks circled our Zodiac in a clear display of curiosity. It was a highlight of the trip for many of the guests that were nearby including myself.”

— ERIC GUTH
Naturalist/Certified Photo Instructor

National Geographic Explorer is the definitive expedition ship. Beloved by many, she's the first ship to embody all our expertise & passion for exploration. Purpose-built, she takes full advantage of the bounty the planet bestows on those seeking nature's finest fare.

Clockwise from far left: The 'circle of truth,' a Lindblad hallmark, is at the heart of lounge where guests gather for the daily expedition Recap; the big bow puts you 'in' the geography we're exploring & gives photographers a prime perspective; our inventive mobile platform is key to our autonomy: we can deploy kayakers literally anywhere; our unique 'open' Bridge invites guests to observe navigation in action and spot wildlife along with naturalists; the chart room is a shrine for those interested in the ship's course, as well as a warm, Bridge-adjacent respite for hot cocoa and coffee.

National Geographic Endurance and her sister ship, *National Geographic Resolution*, are like Darwin's finches, new species that reveal the process of evolution in our expedition heritage. Everything invented for and conceived aboard *National Geographic Explorer* is institutionalized here.

Clockwise from far left: Shift in Lounge design, but the circle of truth remains at the heart of it & Recap is the main event; *National Geographic Explorer* was the first ship to transport scientists and researchers to bridge the ‘grant gap,’ now there’s a locus for them to work aboard & for guests to observe science in action; different library design, same reverence for books on all topics; a high-tech Bridge, adapted to accommodate every guest aboard, lets all share the thrill of being underway; new Marina Deck makes getting out to explore easy.

SELF-DISINFECTING SHIPS: Lindblad Expeditions became the first self-disinfecting fleet with the rollout of the ACT CleanCoat™ system in 2019. This photocatalytic cleaning process activates when illuminated, continuously breaking down unwanted microbes such as bacteria, viruses, mold, and airborne allergens. The positive environmental impacts of this non-toxic, chemical-free system are many: less plastic in the supply chain and waste stream, and more than one million gallons of water saved annually. The system lowers our carbon footprint and creates a cleaner, healthier shipboard environment for guests and crew alike.
